About The Cincinnati Streetcar

The Cincinnati Streetcar is a modern streetcar rail transit system intended to stimulate development, expand transportation options, and enhance livability by connecting key communities in and around the center city. The system, which is scheduled to begin passenger service in September 2016, consists of a 3.6-mile loop extending from The Banks to Findlay Market through Downtown and Over-the-Rhine.

Construction for the Cincinnati Streetcar is being carefully coordinated by the City of Cincinnati with its contractor, utility companies, Metro, and other partners to minimize disruption to residents, businesses and workers along the route. This transportation system seeks to bring more residents and more jobs to Cincinnati, creating a broader tax base to fund city services.
